* and **

25X1 * [redacted] Comment. In comparison with 1,569 cars in March and 1,564 cars in February 1952, the number of freight cars reported for Soviet supply traffic in April 1952 was 960, or a daily average of 32 cars. As compared with the period from January to March 1952, the supply traffic in the area of the Dresden railroad district headquarters 25X1 thus decreased considerably during April 1952. It is believed, 25X1 however, that [redacted] did not completely cover the shipments.
